COMPARED TO : C43 SI Thursday / 22 April 2021

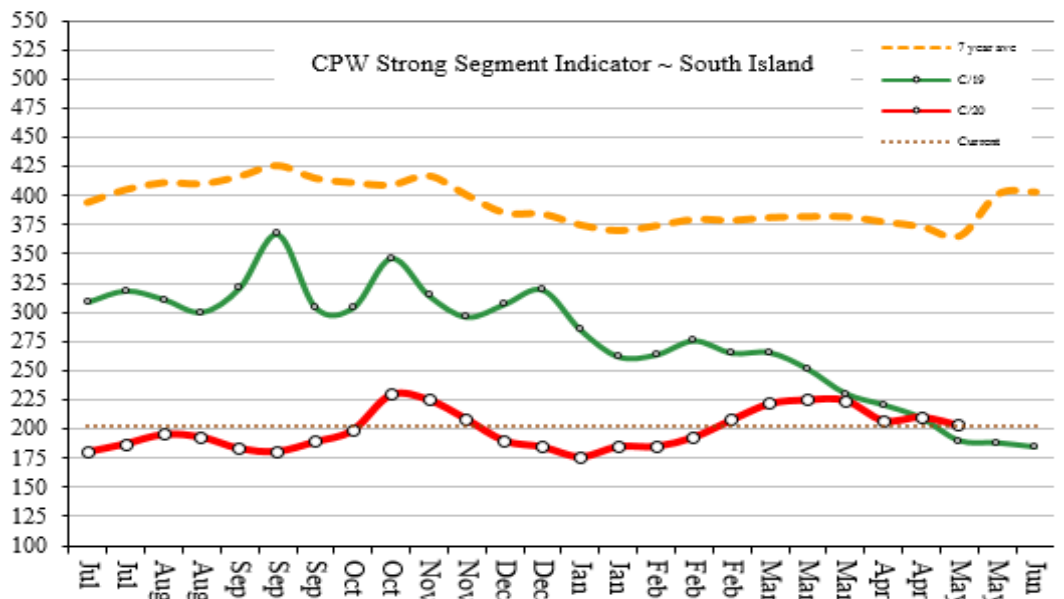

Prices struggled to maintain the levels of our previous sale with most wool types selling in buyers favour. A high percentage of lambs wool saw exporters very selective in their purchases especially in the 30.5 to 32 micron area. Crossbred fleece continues to show high colour readings with prices holding firm, although depending on barb length prices were erratic. Second shear good colour was very selective, but generally struggled to hold their levels. Going forward with Pre Lamb not far away it is concerning to see where prices are currently at.
